Proposal for Modules on VikingGo Mobile Application

Dear Ms. Kamps

I am pleased to submit this proposal for implementing online microlearning modules located on DMC's VikingGo mobile application. The purpose is to help adult learners prepare for online courses.

I've noticed a problem for some online students taking online classes for the first time in that they don't know where to start or how to log into Canvas, Del Mar College's learning management system. I've seen non-traditional students who have signed up for online courses reach out for help on the basics of how to begin taking online courses. There is a need for an orientation geared toward those students for them to be successful.

I want to focus on this by working with departments across campus to ensure that the adult learners needs are met and to prepare them for success. I've prepared a two-year plan to address the creation of the microlearning modules. I understand funding is a concern, and I'm prepared to discuss alternative approaches to achieve this goal.

I look forward to discussing this project with you.

Sincerely,
Melissa Longoria-Goonan
